

**GHOADFI**

REAL WORLD ASSETS

**GhoadFi (GDFI) White Paper v2**

# GhoadFi (GDFI) White Paper v2

## Introduction

**GhoadFi** is a utility token designed to leverage the popularity of the Ghoad character and enhance the ecosystem by providing seamless and innovative tokenization services. GhoadFi focuses on Real-World Asset (RWA) tokenization, making the process of creating, managing, and trading tokens tied to real-world assets accessible to everyone, with unique Ghoad-themed features.

GhoadFi will be built on the Kaspas network (KRC20), leveraging its advanced BlockDAG architecture for fast and secure transactions. The seamless integration with Kaspas ensures low transaction fees and high scalability, making GhoadFi a reliable and efficient platform for real-world revenue generation.

## Vision

**GhoadFi** will serve as the investment arm for Ghoad, focusing on Real-World Asset (RWA) investments. The first phase will involve outsourcing Kaspas mining activities to pioneer companies such as ICERIVER. As we achieve a higher market cap, we plan to establish our own mining farm. Additionally, we will invest in various other sectors such as real estate and cryptocurrencies. All investors will have clear visibility on our investments through daily updates on our website and official channels.

## Key Features

**No Taxes on Transactions:** GhoadFi ensures zero tax on transactions to promote ease of use and accessibility.

**Based on Inscriptions:** GhoadFi will be implemented using inscriptions on the Kaspas network instead of traditional smart contracts.

**Community Engagement:** Leverage the existing Ghoad community on social media and Discord to promote GhoadFi and encourage participation in tokenization activities and governance programs.

## Tokenomics

**Total Supply:** 2,700,000,000 GDFI Tokens

### Distribution:

- **Airdrops for GHOAD holders:** 75% of total supply (2.025 B tokens)
- **CEX, DEX, MP:** 15% of total supply (0.405 B tokens)
- **Real World Investments (RWI)** 10% of total supply (0.27 B tokens)

### Integration with GHOAD

**Airdrops to GHOAD Holders:** GHOAD token holders will receive 75% of their GHOAD tokens percentage as 10 airdrops of GhoadFi (GDFI) tokens. Due to limitations mentioned earlier, the distribution will be based on 0.01% (400k GHOAD tokens) intervals. Holders with less than 0.01% (400k GHOAD tokens) will not receive any GhoadFi airdrops.

### Calculation examples:

- You are holding 400k GHOAD.
- You will receive 0,01% times 75 % times total GDFI supply =  $0.0001 \times 0.75 \times 2.7 \text{ billion} = 202.5\text{k GDFI}$ .
- You are holding 799k GHOAD.
- You will receive the same as above because you didn't meet the 400k interval requirement.
- You are holding between 800k GHOAD and 1199k GHOAD.
- You will receive 0,02% times 75 % times total GDFI supply =  $0.0002 \times 0.75 \times 2.7 \text{ billion} = 405\text{k GDFI}$ .

### Benefits to the Ghoad Ecosystem:

- **Increased Utility:** GhoadFi adds a new layer of utility to the Ghoad ecosystem, providing more ways for users to engage and benefit from holding GHOAD tokens.
- **Community Growth:** Regular airdrops and incentives will attract more users to the Ghoad ecosystem, fostering community growth and participation.

GhoadFi will enhance the overall Ghoad ecosystem by providing, rewarding loyal GHOAD holders, and creating new opportunities for engagement and growth.

### **Integration with Kasp**

In the first phase of our investments, GhoadFi will focus on Kasp mining, starting with the ICERIVER KAS KS5M miner. This miner has a hashrate of 15 Th/s and a power consumption of 3400W, utilizing the KHeavyHash algorithm. According to the recent data, the ICERIVER KAS KS5M generates a monthly income of \$1,441.46, with electricity costs of \$293.76, resulting in a monthly profit of \$1,147.70.

As Kasp's price increases, the profitability of these mining operations will rise. If Kasp hits \$1.80, the monthly profit for the ICERIVER KAS KS5M miner is expected to increase significantly, enhancing GhoadFi's returns.

Additionally, as Kasp mining becomes more profitable, the price of mining hardware is also expected to increase, further boosting the value of our investments. The integration of GhoadFi with Kasp's bullish price movement will create a synergistic effect, enhancing GhoadFi's performance and value. This synergy will benefit GhoadFi holders by ensuring sustained long-term growth and profitability.

### **Real-World Investment Profits Distribution**

The profits generated from GhoadFi's real-world investments will be distributed to holders in a structured manner. However, due to certain limitations, the distribution process will follow specific guidelines. Since this will be done through manual transfers, and our batch transfer tool only accepts identical amounts, the distribution of profits will be based on 0.01% intervals. Consequently, holders with less than 0.01% of the GhoadFi supply will not receive any GhoadFi profits.

Additionally, in the initial phase, GhoadFi will retain 50% of the monthly profits.

This retained amount will be used to increase funding for more exchange listings and further investments in mining operations. Over time, this percentage will be reduced accordingly to ensure more profits are distributed to the holders.

This is a fair launch, with the team and founder not receiving any personal gains from this process. All funds and profits are directed towards the growth and sustainability of GhoadFi, ensuring long-term benefits for its holders.

## Airdrop Schedule

**GhoadFi** will implement a structured plan through an initial airdrop followed by nine monthly airdrops to Ghoad holders. This approach ensures a consistent and systematic distribution of tokens over a period of ten months.

- **Total Airdrops:** 75% of total Supply (2.025B Tokens)
- **Monthly Airdrops:** 10% of the total airdrop allocation (0.2025B Tokens)
- **Initial Airdrop:** October 2024
- **Second Airdrop:** November 2024
- **Third Airdrop:** December 2024
- **Fourth Airdrop:** January 2025
- **Fifth Airdrop:** February 2025
- **Sixth Airdrop:** March 2025
- **Seventh Airdrop:** April 2025
- **Eighth Airdrop:** May 2025
- **Ninth Airdrop:** June 2025
- **Final Airdrop:** July 2025

This phased approach ensures that the distribution is gradual, providing sustained benefits to Ghoad loyal holders.

## Roadmap

### First Phase (July/August 2024)

- Website Launch Done
- Social Media Done
- Marketing Campaigns Done
- Official Launch on Kaspainet Done

### Second Phase (Q4 2024)

- Investing in Kaspainet Ongoing
- Listing on CEX
- Listing on CMC and CG

### Third Phase (Q1 2025)

- Expansion of Investment Portfolio
- Community-Driven Development Initiatives

#### Disclaimer

The distribution of profits from GhoadFi's real-world investments is not promised or guaranteed and should be considered primarily as a discretionary gift for our loyal holders. This process is not legally binding and does not constitute an obligation on the part of GhoadFi or its team. While the team has no intention to change this approach, we reserve the right to modify, delay, or cancel the profit distribution at any time, based on operational and strategic needs.

Holders are advised to understand that while we aim to reward our community, the distribution of profits is subject to various factors and constraints. By participating in GhoadFi, holders acknowledge and accept these terms.
